SUMMARY

I'm a Backend Engineer focused on designing scalable microservices, optimizing API performance, and building reliable systems using Java, Spring Boot, and modern databases.

EDUCATION

Indian Institute of Technology, Jodhpur

Bachelor of Technology, Mechanical Engineering - Dept Rank 3

CGPA - 8.33/10

July 2019 - May 2023

TECHNICAL SKILLS

Backend: Java, Spring Boot, PostgreSQL, Redis, RabbitMQ, MongoDB, Node.js

API & Architecture: REST, GraphQL, Microservices, System Design, Database Management

Testing & Automation: Selenium, API Automation, Jenkins

Frontend (Working Knowledge): React.js, Next.js

PROFESSIONAL EXPERIENCE

SDE-1 | CARS24

Apr 2025 - PRESENT

- Designed and scaled **payment orchestration microservices** enabling seamless routing across **Razorpay, Juspay and Paytm**. using **Java, Spring Boot, PostgreSQL**, handling **1000+ transactions/day** with **98% reliability**.
- Built and optimized **C2C workflows** including seller/buyer monetization, chat payments, lead generation, and seller journeys using **Spring Boot, Redis, RabbitMQ**. Supported **100+ Users per minute** and **50+ daily payments**.
- Enabled bulk upload/download and analytics dashboards by extending backend APIs, improving **sales conversion by 50%**.
- Developed **Verify-360**, a secure **Spring Boot + PostgreSQL** platform enabling users and officials to upload, review, approve, and reject vehicle documents, streamlining the **end-to-end verification workflow**.

Software Engineer | Sprinklr

Feb 2024 - Mar 2025

- Streamlined automation for WFM module tests utilizing **Java and Selenium** alongside **GraphQL and REST API** coverage, resulting in a **4-hour** decrease in overall sanity testing duration through optimized Jenkins job runs.
- Co-developed a modern API **automation framework** eliminating DTO boilerplate and reducing test-case creation time by **70%** through dynamic JSON parsing.

Software Development Engineer | Cogoport

Aug 2023- Dec 2023

- Led development of 5 HRMS modules (Payroll, Onboarding etc.) with a team of 2, delivering **cost-cutting of \$ 50k/year**.
- Implemented Expense and Access management (automating tool access), which are being used by **900+ employees**.
- Improved analytics modules **integrating data from 4 databases**, reducing report generation time by 50%.

SDE Intern | Aspiro

Feb 2022 - July 2022

- Integrated **Microsoft clarity, Google analytics**, Redux, Firebase to collect User data to get 3x more user interactivity.
- Initiated different env's (Staging) for frontend and backend using AWS and Firebase alongside **Automated the deployment** process using **GitLab-AWS**, reducing the deployment time by **70 %**.

PROJECTS

Stylin | Salon Management Software

Dec 2023 - Feb 2024

- Designed backend architecture using Node.js, GraphQL, Express.js, and PostgreSQL (Sequelize).
- Implemented authentication, booking workflows, and role-based access management for salon operations.
- Built scalable APIs supporting the complete booking lifecycle and enabling sales insights.

Gadset - Phone repairing MarketPlace

May 2023 - Aug 2023

- Built a Users app containing a bidding system - users can book a repairing agent in 5 steps. A partner app, allowing partners to quote on bids and track their orders in 6 stages, fostering efficient collaboration both using React.Js.
- Architected a high-performance Node.js backend connected to MongoDB, enabling seamless real-time bidding between customer and partner; increasing engagement rates by 25% across the platform.

ACHIEVEMENTS & POR'S

- Led 35-member team for accommodation and transport operations serving 900+ participants (Varchas 22).
- Designed braking system for BAJA SAE'21 ATV; led team of 4 engineers.
- Attained **13K rank** in JEE Mains, January 2019.
- Achieved **14k rank** in JEE Advanced, May 2019.
